

Intelligent Systems Source: JUNE DIGITAL DEAL

www.intelligentsystemssource.com

Unfettered by alliances to specific technologies or architectures, ISS gives an unparalleled compendium of products for engineers to research, compare, contrast and buy through our unique Parametric Search Engine.

In addition to the largest catalog of SBCs, I/O Boards, Systems and Software – ISS provides unique content and marketing opportunities to vendors selling into this dynamic market.

Intelligent Systems Source offers its JUNE DIGITAL DEAL Marketing Package

\$1,250 per month (six month commitment)

book before June 30, 2016

Reach 640,000 engineers, developers and technology decision-makers.

- Monthly ISS e-Newsletter Top-Product or Body Ad position (300x250) – 51,000 subscribers per month
- Monthly ISS website sponsorship –54,000 visitors per month
 - Billboard page
 - 20 product listings
 - 6 white papers
 - 6 video listings
 - 6 month body ads [300x250]
- One-time use of 10,000 targeted email contacts – you select the criteria!

44% SAVINGS

Lock-in this comprehensive and targeted digital marketing activity.

Contact your account rep for details.

Experts Discuss Today's Challenges in Security and Anti-Tamper

here's little doubt that the trend of designing embedded security and encryption functionality into systems continues to grow in importance. This is a particularly challenging area because the demand for expertise is high while the costs of doing customized designs are a real burden. The reality is that support for anti-tamper capability or Differential Power Analysis (DPA) attack prevention aren't something that consumer chip makers are motivated to add to processors and memory chips. There have been advances in FPGAs and SoC offerings along these lines however. And embedded board vendors have started to take advantage of those.

Add Life to Your Legacy System with the New VME SBC

Acromag

Add 7 to 10 years of life to your system with this **high-performance SBC** that features a FPGA-based VME to PCIe bridge.

Acromag is focused on developing embedded computing solutions that provide the best long term value in the industry.

400-Watt 3U VPX DC/DC Converter
Model VPX57-31 w/ 270 VDC input

- For VITA 46.0 & VITA 65 systems
- Plugs into VITA 62 1.0" slot
- Six outputs at 400W
- Conduction cooled

For rugged 3U VPX power applications

compucon

CDM Express Compact conga-TC170

32GB Dual-Channel DDR4 memory

Innovation

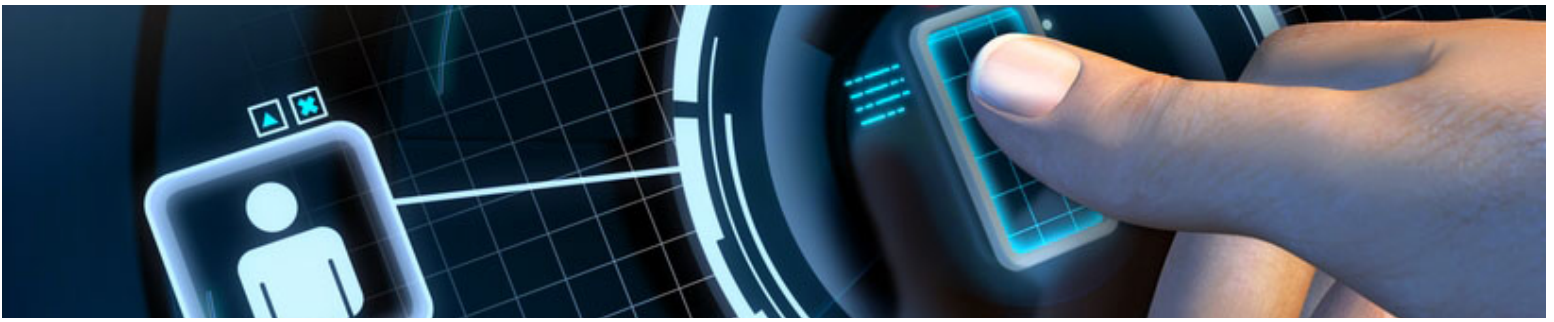

New generation secure Advantech TCA ecosystem supports critical defense applications.
